

We are hiring!
JUNIOR AUTOMATION ENGINEER (M/F)

📍 Liège (Belgium)

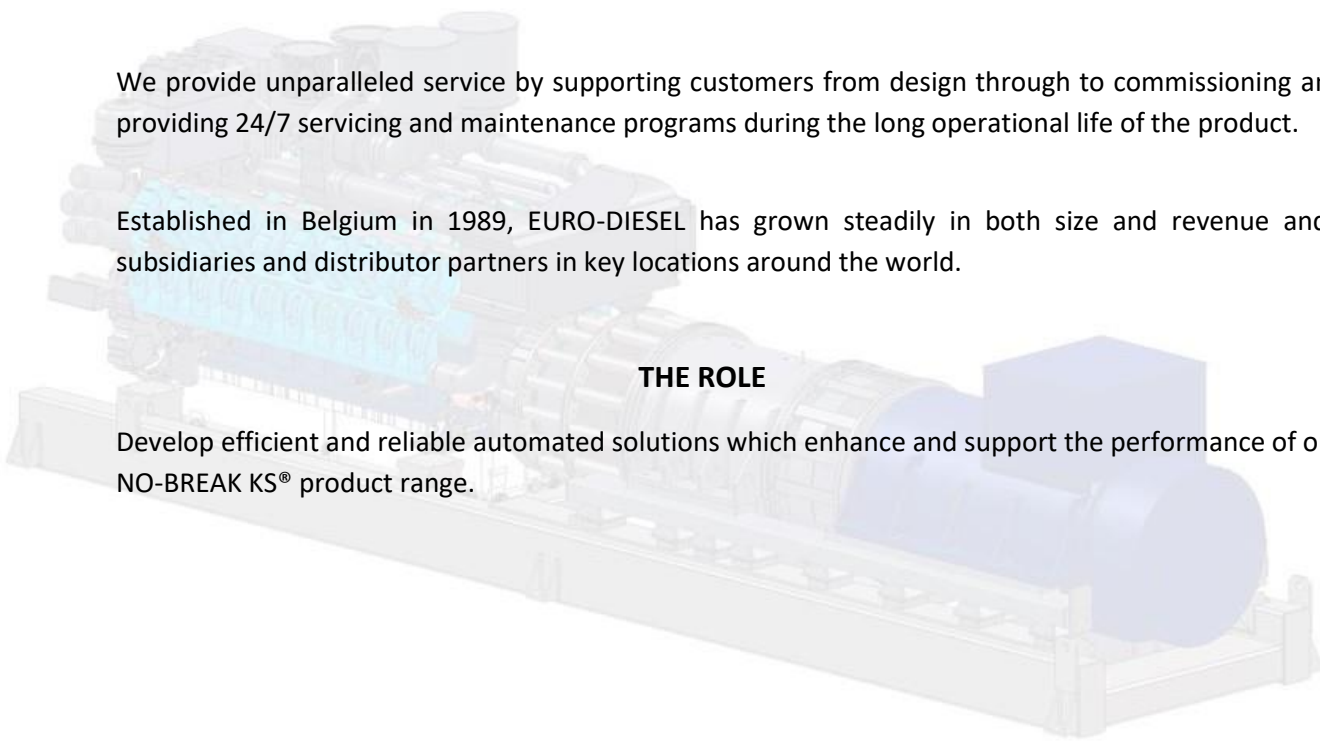

EURO-DIESEL is a turnkey critical power continuity provider. Our mission is to secure power supplies and ensure business continuity to critical applications worldwide by providing innovative, resilient power solutions with our Dynamic Rotary UPS (DRUPS) systems.

We provide unparalleled service by supporting customers from design through to commissioning and by providing 24/7 servicing and maintenance programs during the long operational life of the product.

Established in Belgium in 1989, EURO-DIESEL has grown steadily in both size and revenue and has subsidiaries and distributor partners in key locations around the world.

THE ROLE

Develop efficient and reliable automated solutions which enhance and support the performance of our NO-BREAK KS® product range.

KEYS TASKS

Development:

- Design new functionalities which result in technically efficient and standardised solutions
- Undertake feasibility studies on any special features requested and guide customers, if necessary
- Ensure PLC control solution developments are durable and meet customer specifications and standardisation requirements

Projects and Production:

- Customise PLC programs to meet specific customers criteria
- Define testing protocols to validate correct functioning
- Attend factory tests of non-standard equipment/components and make the necessary amendments
- Participate in on-site tests which may require travel outside Belgium
- Support the After-Sales service team to resolve any issues linked with PLCs

YOUR PROFILE

- Engineering Degree, preferably in automation, electronics or industrial
- Experience with PLCs (SAIA or others) would be an advantage
- To be able to code and read program codes in different languages
- Problem solver/good communicator
- Fluent French with a good knowledge of English
- Open to occasional short-term travel

OUR OFFER

- The opportunity to join and evolve with an established, yet innovative and expanding company, active at a global level
- The opportunity to build a quality system and to have direct impact on production and the overall performance of the company
- Work on a mix of short and long-term projects
- Salary commensurate with your level of experience plus benefits package

To apply, please send your CV and covering letter to: jobs@euro-diesel.com.

Applications will be treated in the strictest confidence
